### Report on Extension Activities

Dry Waste And Wet Waste segregation extension activity carried out by 50 students in college campus and created awareness in village ..... In this great social extension work all SR and CR from class involved and tried there best to create awareness among village people's. GS from college Mr.Rohan Patil given brief and detail information about segregation of waste and how to dumb and resuse among village people's. India produces 62 million tonnes of waste each year. When we segregate waste, there is not only a reduction of waste that gets landfilled, it also reduces pollution levels by lowering the percentage of garbage exposed to air and water. Dry waste is the kind of waste which is not biodegradable. Hence wet waste can be converted and recycled in Proper WM is necessary because, it will help in reduce it and exposed to air and water. Dry waste is the kind of waste which is not biodegradable. Hence wet waste can be converted and recycled in Proper WM is necessary because, it will help in reducing

- Greenhouse gas emission
- Toxic gas explosions
- Waste Landfill

Air, soil and water pollution, etc.

Total 80 peoples from village present there to listen and some people's really appreciated students effort and they taken a oath to carry clean and reusable friendly environment.

#### Segregation of waste at College

Segregation of dry waste and wet waste can be done from college. This habit will reduce the burden of the municipal authorities to segregate the waste. To get started with it, you just need some awareness and the desire to act towards this.

You need to keep these following things in mind before segregating waste at home:

- Keep 2 separate dustbins for dry and wet waste
- Remove any covering on the waste before throwing it in the dustbin
- Do not mix wet waste with dry waste
- Keep the plastic from the college and surrounding dry and separate in the dry bin
- Keep the dry waste rinsed of any food content before throwing in dry bin
- Throw the sanitary waste in a separate paper bag

**Conclusion:** wet garbage and dry garbage Wet waste and Dry waste segregation are necessary for every individual because they will help us keep our environment pollution free and also keep the environment healthy. These segregated wastes can be reused and especially plastic waste can be recycled into new products and plastic granules.
